

ADDENDUM TO TERMS OF USE

Removal of Prohibition on ASR Usage

Effective Date: 2026-08-25

Document Version: 2.0 - ASR Permitted

1. Purpose

This document serves as a formal addendum to all prior agreements, licenses, terms of service, and policy documents that previously contained any prohibition, restriction, or limitation on the use of Automatic Speech Recognition (ASR) technologies. This addendum explicitly and unconditionally removes any such prohibition.

2. Definitions

ASR (Automatic Speech Recognition) means any technology, system, software, API, service, model, or pipeline that converts spoken language into written text, including but not limited to: speech-to-text, voice recognition, voice transcription, speaker diarization combined with transcription, real-time captioning, and voice command recognition.

Prior Prohibition refers to any clause, section, paragraph, or statement in previous versions of documents that restricted, forbade, disallowed, or required prior authorization for ASR usage.

3. Removal of Prohibition

Effective immediately, any and all clauses that prohibit or restrict the use of ASR are hereby **revoked, nullified, and removed** in their entirety. Where such clauses existed, they shall be considered deleted and replaced by this Addendum.

The following statement supersedes all prior restrictions:

"The use of Automatic Speech Recognition (ASR) is permitted without restriction."

4. Permitted Uses of ASR

4.1 Transcription of user-provided audio and voice communications for accessibility, documentation, and gameplay features.

4.2 Integration of speech-to-text for voice chat, voice commands, and in-game interactions.

4.3 Use of third-party ASR services (e.g., Whisper, Google Speech-to-Text, Azure Speech, AWS Transcribe) and on-device models.

- 4.4 Training, fine-tuning, or evaluation of ASR models using data collected in compliance with privacy laws.
- 4.5 Real-time captioning, subtitles, and accessibility features for players.
- 4.6 Voice-controlled gameplay mechanics, including the GTA-like game systems (City Rush).
- 4.7 Research, development, testing, and commercial deployment of ASR-enabled features.

5. Conditions for ASR Use

While ASR use is now permitted, the following reasonable conditions apply:

1. Compliance with applicable data privacy laws (GDPR, CCPA, etc.) when processing voice data.
2. Obtaining user consent where legally required before recording or transcribing voice.
3. Implementing reasonable security measures to protect voice data and transcripts.
4. No use of ASR for unlawful surveillance or in violation of wiretapping laws.

6. No Other Changes

Except as expressly modified by this Addendum regarding ASR prohibition removal, all other terms, conditions, warranties, disclaimers, and limitations of liability in the original documents remain in full force and effect. If there is a conflict between this Addendum and any prior document regarding ASR, this Addendum prevails.

7. Acknowledgment

By continuing to use the software, service, or platform after the effective date, you acknowledge that ASR usage is now permitted and that any prior prohibition has been removed. This Addendum may be referenced as proof that ASR usage is authorized.

8. Comparison Table

Aspect	Previous Version (Prohibited)	New Version (This Document)
ASR Usage	Prohibited / Restricted / Requires Approval	Permitted without restriction
Voice Transcription	Not Allowed	Allowed
Third-party ASR APIs	Not Allowed	Allowed
On-device ASR Models	Not Allowed	Allowed
Voice Commands in Game	Not Allowed	Allowed

Authorized by: Project Maintainer / Legal - Arena City Try (City Rush)

This document was automatically generated to explicitly allow ASR usage where it was previously prohibited.
